Claim Rejections - 35 USC § 103

1. Claims 1-5,8,11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schwartz '507 in view of Hill et al '134.

Schwartz teaches all of the subject matter of the above claims except for *transvenously* positioning a vagal electrode. Hill teaches such positioning. It would have been obvious to implant the electrode of Schwartz transvenously, as shown by Hill, in order to avoid the risks associated with other types of implantation, as taught in column 1, lines 52-65 of Hill.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 27,28,31,32,33 are rejected under 35 U.S.C. 102(e) as being anticipated by Brownlee et al '862.

Brownlee shows atrial electrodes 30,32, and an electrode portion 36 which can come into contact with tissue proximate to the cardiac branch of the right vagus nerve. Further, multiple conductors are inherent, since pacing or defibrillation is done between electrodes. The lead also contains ventricular electrodes 26,28.

Allowable Subject Matter

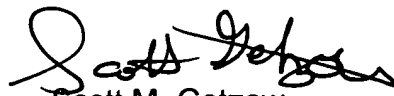

4. Claims 6,7,12-26 are allowed.
5. Claims 9,10,29,30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Because new art has been applied in this office action, the action is not being made final.
